Foreword	v
List of Winter Schools of Theoretical Physics Held in Karpacz: 1964-1991	vii
List of Lectures Delivered in the Course of the XXVII-th Session	xi
Part I CLASSICAL FIELDS: INTEGRABILITY, HIERARCHIES, VIRASORO ALGEBRAS	
Self-Duality, Integrable Systems, W-Algebras and All That <i>I. Bakas</i>	2
Integrable Hierarchies, Virasoro Algebra, and Virasoro-Constrained Hierarchies <i>A. M. Semikhatov</i>	36
Integrable Hamiltonian Systems and Their Fermionic and Supersymmetric Extensions <i>A. P. Fordy</i>	86
Toda Theories, Integrability and Conformal Invariance <i>L. Bonora</i>	113
KdV Type Equations in Conformal Field Theory and Subcritical Strings <i>P. Mathieu</i>	138
KdV Type Equations in Subcritical Strings <i>P. Mathieu and D. Sénéchal</i>	144
(m)KdV-Soliton Solutions on Quasi-Periodic Finite-Gap Backgrounds <i>F. Gesztesy</i>	171
Dispersion Equation Technique for Periodic Solutions of NLPDE'S <i>J. Zagroźniński</i>	195
Gauge Transformations and Reciprocal Links for Integrable Equations <i>W. Oevel</i>	205

Symmetries on Soliton Manifold <i>M. Błaszak</i>	215
Skyrmions and Their Scattering in (2+1) Dimensions <i>B. Piette and W. J. Zakrzewski</i>	225
Vortex-Vortex Scattering <i>J. Burzlaff</i>	244
Part II Q-DEFORMATIONS AND QUANTUM GROUPS	
Solvable Lattice Models and Representation Theory of Quantum Groups <i>T. Miwa</i>	258
Integrability of Strings <i>S. Saito</i>	286
A q-Deformed Probability, Nelson's Inequality and Central Limit Theorems <i>M. Bożejko</i>	312
Supercovariant q-Oscillators <i>M. Chaichian, P. Kulish and J. Lukierski</i>	336
q-Deformations of Conformal Algebra and Its Central Extension <i>A. Isaev and Z. Popowicz</i>	346
Part III RANDOMNESS VERSUS QUANTIZATION	
Topics in the Quantum Theory of Non-Integrable Systems <i>R. Vilela Mendes</i>	360
The Second Law of Thermodynamics: Comments from Ergodic Theory <i>M. C. Mackey</i>	384
A Fundamental Relation Between Stochasticity and Quantization <i>L. de la Peña and A. M. Cetto</i>	416

Detailed Balance and Radiative Corrections in Stochastic Electrodynamics	436
<i>A. M. Cetto and L. de la Peña</i>	
Nelson's Stochastic Mechanics as the Problem of Random Flights and Rotations	455
<i>P. Garbaczewski</i>	
Excursions in Stochastic Mechanics and the Quantum Mechanics of Brownian Motion	478
<i>A. Truman and D. Williams</i>	
Invariant Measures for Classical and Quantum Fields	500
<i>Z. Haba</i>	
Part IV FERMIONS: CLASSICAL, RANDOM, QUANTUM	
Reproducing Kernel Spaces and Random Fields for Fermions	512
<i>J. Kupsch</i>	
Methods for Solving Path Integrals and QED from Classical Particle Trajectories	529
<i>I. H. Duru</i>	
Construction of Solutions of Nonlinear d'Alembert, Maxwell, Yang-Mills Equations by Solutions of Nonlinear Spinor Equations	544
<i>W. Fushchich</i>	
On Schwinger Terms in (3+1) Dimensions	557
<i>E. Langmann</i>	
Anyons and Chern-Simons Theory: A Review	568
<i>G. W. Semenoff</i>	
Part V MISCELLANEOUS	
Classical String with Rigidity	602
<i>H. Arodz</i>	

The Unified Approach to Integrable Relativistic Equations: Soliton Solutions over Non-Vanishing Backgrounds	617
<i>I. V. Barashenkov, B. S. Getmanov and V. E. Kovtun</i>	
Λ-Model: A Universal Class of Kink-Bearing Systems	655
<i>J. A. Holyst and H. Benner</i>	
Dynamical Symmetries and Finite Dimensional Nonlinear Systems: Integrability and Separability	665
<i>M. Lakshmanan and M. Senthil Velan</i>	
On the Entropic Properties of Quantum Dynamical Systems	675
<i>W. A. Majewski</i>	
On the Choice of Invariant Variables for Two-Particle Processes	682
<i>V. R. Garsevanishvili and M. B. Sheftel</i>	
List of Participants	693
